The Advance

Final Examinations and Promotion Results For Year Ended June 30

Promoted To Grade 2 With Honors:-

Dudley Connors 94 4; Ray Coey 93 7; William Lee 90 5; Elaine Butts 93; August Rosenaus 88 4.

Passed To Grade 2:-
Gerhard Boese 84 8; Albert Ford 81 4; Theodore Milligan 68 2 (conditioned); Failures 1.

Promoted To Grade 3 With Honors:-

Helen Peters 93 2; Nancy Conner 89; Eva Marr 88 5; Theodore Rosenaus 88 4; William Proudfoot 86 8; Marie Gilbertson 84 8; Annie Slutanski 84 6.

Passed To Grade 3:-
Ross Ford 72 2; Edward Enokson 67 6.

Promoted to Grade 4:-

Edon Rideout 91 7; Dorita Whelan 84 4; Ross Guss 83; Lois Robinson 80 9; Mary Boese 73. Failures, 2.

Promotion Results, First Year High School:-

	Literature I	Composition I	History I	Algebra I	Geometry I	Science I	Latin I
Murray Coates	61	54	53	72	61	60	
Arthur Loader	67	72	65	78	70	71	
Kathleen Proudfoot	84	86	89	100	93	83	86
Chester Rideout	70	67	64	85	73	70	60
Earl Robinson					76		

Promotion Results, Second Year High School:-

	Literature 2	Composition 2	Science I	Latin I
Adelpha Bennett	70	74	65	
Edith Marr	58			
Winnie Murray	80	81		
Mary O'Malley	51	64	60	
Dean Tomkins	62	60		
William Youell	70	60	76	

If no mark appears opposite unit taken it denotes failure in that unit 7 units fail in all.

Winnipeg Grain Pit Discovers New Facts About Grasshoppers

WINNIPEG, June 21—Scores of traders in the Winnipeg Grain Exchange pit last night knew something about the vitality of grasshoppers. A "bear" trader gathered a quart bottle of "dead" grasshoppers in the Bird's Hill district of Manitoba during the week end just to show how the rain had killed the pests. But there was a skeptic when he displayed them at the grain exchange.

A handful of the hoppers—just about the size of full grown mosquitoes—was placed on a sheet of paper and held over an electric heater which stenographers used for boiling water for tea.

A couple of hoppers moved, then a few more jumped a bit. Within a minute the whole handful perked up, hopper off the paper and onto desks. They raced for cover and something new in grasshoppers campaigns had to be executed in a hurry.

Word Is Received Here Of Mrs. Esler's Death

Word was received here on Tuesday noon that Mrs. Esler of Cereal was found dead in her car in the garage due to carbon monoxide gas. Burial services will be held at Hanna on Friday.

The news of Mrs. Esler's death came as a great shock to both Cereal and Chinook, as Dr. and Mrs. Esler and family have lived at Cereal for about 12 years. Dr. and Mrs. Esler have been highly respected in Chinook and district. Mrs. Esler had at all times been a competent and willing worker in connection with the Woman's Institute holding the office of constituency convenor for some years. Also she had been a leader in all social affairs at Cereal.

Miss Irene Marcy who has been teaching at Langford school and Doris Marcy who has been teaching north of town arrived home on Friday.

Weather conditions still continue to be favorable to crop growth with some precipitation nearly every day.

Object-Lesson Of Peace

Whatever may be the individual reaction to customs houses as between Canada and the United States, there is general unanimity upon the world value of the lesson presented by the unique fact that not a gun nor a fort stands as provocation between the two countries throughout the whole extent of the international boundary.

This is so phenomenal a situation that it has attracted universal attention, been the subject of thousands of after-dinner and more ceremonious addresses, and stands to-day in a belligerent world as a supreme example of what understanding and goodwill can do to preserve the peace of an immense borderline, to cement friendship between two great branches of the Anglo-Saxon family.

For more than 100 years, peace has existed between the Canadian and American peoples, and it is almost inconceivable that any set of facts or factors could disturb the serenity of the relationship existing between the nations north and south of the boundary line.

That goodwill and understanding has been of almost incalculable benefit to Canada. Billions of dollars of American money has been invested in this country; hundreds of thousands of American people have come to settle in our midst. That money has helped materially in the development of Canada; those people have contributed their share to the upbuilding of a great dominion of the British Crown. Together they have helped to achieve that economic diversity upon which Canada has been able to build its economic fabric on a national scale. These facts are evidence of the confidence with which the people of the sister country view their neighbors to the north and testify to the keen appreciation they have of the solidarity of British institutions and British forms of government.

The unique and signal character of this unfortunate frontier, the amity between the two nations, and the close economic relations which seem to stand superior to trade rivalries, have attracted attention of the Carnegie Endowment for International Peace, which proposes now to make a special study of the factors lying behind a situation which stands as an impelling object-lesson to peoples of the globe.

Whether or not any definite conclusions can be reached, whether or not a tangible cause can be deduced from the obvious facts, which might be made applicable as a general world principle, remains to be seen. The facts stand in their amazing isolation—peace, goodwill, and understanding are better weapons of defence than all the guns ever forged and all the forts ever built.

Superficially, at least, it would appear the fundamental background to the phenomenon is of the spirit, and for that reason, too intangible to lend itself to any concrete definition or be written into any formula for use of peoples who, similarly situated geographically, cannot get along together.

Whatever the finding, the lesson stands for the world to view—an irrefutable proof of what two nations may do if they will to live in peace and amity, confirming evidence that, demonstrating their mutual goodwill by dispensing with the so-called weapons of the defense, neighbors may live in harmony without incurring those conditions of the mind or of the body politic, which lead to war.

Probe Working Of The Brain

Use High Radio Currents To Stop Functioning Of Limbed Areas

How a University of California psychologist used high radio currents to stop the functioning of limited areas of the brain without interfering with the other parts, to study the purposes of particular centres of the brain, was described by the American executive of the Women's Missionary Society, Presbyterian Church in Canada (Western division).

This somewhat startling method of probing the functional workings of the brain was based on the research of Dr. Clarence W. Brown of the university's psychology department. Dr. Brown suggested his method of brain study should prove serviceable in solving anatomical and psychological problems in which a small controlled elimination of a function is desired.

Fixed Price For Tobacco Growers

Imperial Tobacco Company Of Canada Limited Signs Tobacco Growers' Agreement

Gray Miller, president of the Imperial Tobacco Company of Canada, Ltd., states that "The Ontario烟农 are now practically assured for 1934 a price based on 27c per lb., for an average crop. Although we are still without any assurance that other manufacturers will follow our lead, we have now agreed to meet the request of the growers for a 27c average price, and we have given them our definite undertaking in writing to adhere to that basis for the 1934 crop, provided they can secure an agreement from the other manufacturers to pay the same price."

Overcoming Their Fear

Operations Are Becoming Rage Among Natives Of India

Operations have become quite the rage among the natives of Jodhpur, India, and no patient feels that he has received proper treatment without one, according to Miss Isabel McConnell, missionary, based in蒙特利尔 at the meeting of the council executive of the Women's Missionary Society, Presbyterian Church in Canada (Western division).

This represents a change of attitude, for the first surgical patient was so frightened at the idea of being "put to sleep" that he jumped from the operating table and ran home.

Among the instances showing the great work being done for the people through the hospital was that of a blind man who had to be led there, and who, after cataracts had been removed, went home unaided. The gratitude of the patients is most touching, stated Miss McConnell.

Sacred Pipe Exhibited

Indian Tribe Shows Pipe With Impressive Ceremony

The sacred pipe of the Arapahoe Indian tribe, a tribal fetish carefully guarded from the eyes of the curious, was recently shown to Bishop Elmer Schmuck of the Episcopal Diocese of Wyoming during his annual visit to the Wind River reservation near Lander.

At an impressive ceremony the hundreds of yards of cloth and finally, the pipe, in which the curious talisman is kept were unwrapped for Bishop Schmuck, his son, Gordon and Thomas E. Brown of New York

Dominion Agricultural Bulletin on prairie farm costs, says: A half-section grain farm in the prairie provinces when operated by one man and seven horses would be able to produce wheat at 79.5 cents per bushel, while, when operated with a 10 h.p. tractor and two horses, the cost would be increased to 85 cents per bushel.

Modern War Implements

Britain Installing Rapid Fire Gun In Fighting Planes

A big gun era begins in aerial warfare. A 37-millimeter, rapid fire, automatic gun is being installed in some of the larger fighting planes of Great Britain and promises to have a "tremendous advantage" over an opponent carrying only the ordinary machine gun.

The heavy gun shoots more slowly, sending out its messengers of death at the rate of only five in four minutes. But each shell weighs a pound and a half and is considered certain to disable any plane however slightly the impact is effected. And the slow-shooting heavy gun trusts to its long range to give it victory over the hornets. The small, light plane with its sputtering machine gun is never to be permitted to come within effective range.

The report says: "Excellent results at both ground and air targets have been obtained at 2,000 yards."

Promised that gives British air fighters a fine start over all competitors in the armament race. But the presumption lingers before the announcement that the new device was developed by experts connected with one of the great armament manufacturers whose trade always has been international.

And even if the British government seizes complete control of that particular make, it can be certain that shortly after the usefulness of the invention has been demonstrated, arms makers of other nations will be out with guns for airplanes that can shoot shells just as big, just as far and perhaps just a little faster.—Detroit News.

Praises Missionary Efforts

Doctor Credits Christianity With Great Progress In Asia

The change which Christianity worked in the conditions of millions of women, and the part which Christian women took in working these reforms was the theme of an address at Highclare, South Africa, by Dr. J. R. Mott, president of the World Missionary Council, at a meeting of women workers of all Christian denominations.

The effect of Christian missions upon the lives of women would be sufficient evidence, he said, to convince him of the worth of foreign missions. An additional argument in the devotion and the achievements of Christian women in the missions.

To thousands of women in heathen lands the relief brought by the medical missions, the establishment of hospitals, and the creation of nursing services had been immense.

When the lead and did the greater part of the work in this field of service. It might be said that Christian missions had created the medical profession throughout Asia.

Fortune Has String Attached

Man Must Marry By Christmas 1938 To Inherit

If John Francis Gallagher, of parts unknown, takes unto himself a wife or before Dec. 25, 1938, and settles down to home life he will receive £100,000 from his aunt, Mrs. K. Zarah, 143 Well Hall Road, Eltham, London, Eng.

The offer of wealth was disclosed in a letter from Mrs. Zarah to Acting Mayor J. A. McFerchar of Wimpey. She said she was obliged to make a public appeal as to her nephew's whereabouts because she had lost all trace of him several years ago.

Mrs. Zarah, in her letter, said the last address she had of her nephew was box 130, Carbon, Alta., and general delivery, Prince Albert, Sask.

If Gallagher is not located and married by the date set, Mrs. Zarah said she would bequeath all her real and personal property to the church and charity.

Cost Of Farm Production

Dominion Agricultural Bulletin on prairie farm costs, says: A half-section grain farm in the prairie provinces when operated by one man and seven horses would be able to produce wheat at 79.5 cents per bushel, while, when operated with a 10 h.p. tractor and two horses, the cost would be increased to 85 cents per bushel.

Proved Idea Wrong

Remarkably vigorous tomato plants have been grown out of doors at Fairbanks, Alaska, under continuous daylight for six weeks, despite the reports that daily artificial, or artificial and daylight, exposures of 17 hours or more are injurious to tomatoes.

Obligate plants are plants which can grow in but one life condition.

Synthetic Rubber

Automobile Tires Now Made In U.S. From New Substitute

The first American synthetic rubber automobile tire which look like real rubber and wear fully as well, were announced recently.

They were described as a potential checkmate against excessive rubber prices and a guarantee of American rubber independence in war-time. The synthetic rubber now costs about \$1 a pound, against 15 cents for foreign real rubber, which has ranged from five cents to more than a dollar.

The announcement was made jointly by the Dupont Company, makers of the synthetic rubber, and the Dayton Rubber Manufacturing Company, of Dayton, Ohio, making the tires.

The synthetic rubber is made of acetylene, salt and water. The acetylene comes from coal and limestone, so that all the ingredients are home products.

J. A. MacMillan, president of the Dayton company, issued this statement:

"These tires have been subjected to rigid laboratory and road tests and have proved themselves fully the equal of tires built of natural rubber. They have been placed on automobiles opposite tires built of natural rubber and have been subjected to severe usage."

Use Of Radium

Dr. Shepley Deals With Advance Made In Use Of This Medium

In Recent Years

"It is definitely recognized to-day that the scope of radiotherapeutic attack has so widened that it now embraces a very large per cent of the total cancer field," Dr. Earle E. Shupley, radiotherapist for the Saskatchewan cancer commission, of Saskatoon, told delegates to the Canadian Medical Association at Calgary. His paper dealt with the advances made in the use of radium as a therapeutic agent since its discovery in 1910.

"Because of late recognition," Dr. Shepley said, "a large per cent of cases of cancer cannot be considered from the viewpoint of curative attack. In those that have been given curative treatment procedures, possibly not more than one-third are cured. From these groups, a large number require palliative radiotherapy." This is a matter of importance because such procedure reduces suffering even if not effecting a cure, Dr. Shepley explained.

Will Regulate Tariffs

Dr. Shotwell Explains Powers Given To Roosevelt

Economic problems, including tariff questions, would be more smoothly adjusted between Canada and the United States as a result of the powers to regulate tariffs given to President Franklin D. Roosevelt, Dr. James T. Shotwell, former Canadian representative of the United States at the peace conference in 1918 and present professor of history at Columbia University, New York city, told the Ottawa Canadian Club. Formerly these powers were the prerogative of the United States government.

Gold In Canada

Gold is found in every province of Canada except Prince Edward Island, and is point of value it ranks with coal as the two most important mineral products of the Dominion states. The Department of Mines, Ottawa.

"Minnow" submarines weighing only 12 tons and measuring 29 feet in length have been given successful underwater tests in Japan.

In English law, a bailiwick is the district within which a sheriff may exercise jurisdiction.

When you smoke plug tobacco, you can cut each pipeful fresh when you want it—and you can cut it any way you like, coarse or flaky. Plug tobacco is economical, too, for it lasts longer in your pipe.

DIXIE PLUG SMOKING TOBACCO

Regular White Elephant

Automatic Give Minister From India Lots Of Trouble

Rev. Elbert M. Moffatt, central treasurer of the Methodist Episcopal Church in India, was a sadly troubled man when he arrived from Europe on the liner American Trader, with a .45 calibre automatic revolver.

The automatic became a source of trouble to Mr. Moffatt before he left Bombay. The weapon was taken there by a bishop's sister, whose American friends felt she would need something to protect herself when she was so far from gentle Oldham.

It is, however, illegal to have a pistol that is not registered by the police in India. And the police refused to register the pistol because its bore was the same as that of theirs.

The Bishop's sister appealed to Mr. Moffatt to take the pistol back to the United States when he sailed.

He had it in his possession for two weeks before he left India with his wife and their children. And the police kept a constant watch on him, which was most embarrassing.

When he arrived in the United States he listed the pistol on his customs declaration. The customs agents said they were not interested. He felt relieved that he was not violating any law, but the helpful customs agents said: "While the pistol does not violate our law, it violates the New York State law, of course."

Mr. Moffatt threw up his hands. "I am," he said with determination, "taking it to the nearest police station."

A Miracle Of Speed

Nineteen Girls In London Factory Make Shirt In Minute

Those who refuse to believe that a shirt with all its stitching, trimming, button-holing, and so forth, can be made in one minute, should go to a building in London, and see nineteen girls, seated at nineteen tables, separated into two blocks, by a moving conveyor, performing this miracle of speed. Each girl performs one operation. One sews cuffs, another makes collars, another buttonholes. All the time shirts in various stages of completion are moving with the conveyor from one table to another. At full pressure the minute can be reduced, it is said, to fifty-five seconds!

Gift For British Admiralty

Charles Courtney, master locksmith, arrived in London from the United States and he would present to the Admiralty certain rings and articles of wearing apparel belonging to the late Lord Kitchener. Courtney said he saved the articles from H.M.S. Hampshire, the ship which carried Lord Kitchener to his death while on an official mission during the war.

Husband Needed Sympathy

In granting a divorce to a talkative woman at Toledo, Ohio, Judge James Austin explained that it was given "as a favor to her husband". Mrs. Northera V. Mueller could not be stopped by judge, attorneys or bailiff after she began a recital of her domestic affairs. The husband did not contest the action.

Population Of India

Showed Increase Of Thirty-Four Million In Ten Years

Dr. J. H. Hutton, C.I.E., I.C.S., chief commissioner for the census of 1931, in his census report wrote that for long China was considered to hold the greatest aggregate of human beings in the world more or less under the same administration, but India's population now even exceeds the latest estimate of the population of China. The difference between the kind of government China has had during the present century and the kind of government that India has had could not be better illustrated.

The census of 1931 gave India a population of 353 millions on an increase since 1921 of just under 34 million. The increase in the ten years from 1921 to 1931 is alone almost equal to the total population of France or Italy and much greater than that of important European powers like Poland and Spain. If there was an increase of 34 millions between 1921 and 1931, similar or even greater increases between 1931 and 1941, bringing India's population almost up to the 400 million mark which is envisaged by Sir John Megaw, cannot be dismissed as impossible.—Calcutta Statesman.

Kept Old Appointment

Friends Meet In Denver On Schedule After Twenty Years

Three men entered the office of a Denver newspaper promptly at 11 o'clock on a recent morning to keep a rendezvous made 20 years ago. The trio consisted of Earl E. Anderson of El Centro, California, H. H. Bromley of Denver and F. A. Donk of Rocky Ford, Colorado.

They explained that one night in 1914, while all were living in Denver, they made an appointment to meet in that particular building a score of years later.

OCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla, Hoyt and Peter Ames, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor, trying to make his mark in the art world. Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying to become an artist. One of her students is Avis Werth, another wealthy girl who is trying to win Peter. Sylvia Todd, Peter's model and friend, has a secret affair with whom he has quarreled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Hoyt and Camilla go to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This causes Hoyt to leave. Camilla goes to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help Hoyt along, but Peter refuses. Hoyt leaves. Peter and Camilla have gone from the studio Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla to come to see him. It is for it. Camilla suggests "Eager Youth" and Avis "Inspiration". Peter adopts the latter title and Camilla heartily goes to Peter's studio for him and Hoyt. Hoyt and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters at his exhibit a statue he had sculptured especially for her as a wedding gift. They name it "Land of Hope".

(Now Go On With The Story)

CHAPTER L

Avis was one of the first visitors at the museum when the exhibit opened the following week. Her eager, anxious inspection of the vast gallery filled with sculptured pieces, might have indicated that she was one of the most ambitious of the entrants. Her eyes scanned one side of the room hurriedly, darted to the other end. Even in that brief interval of suspense, her heart sank heavily with the dread of disappointment, before her eyes found that object which they were searching impatiently.

Yes, there it was. Peter's "Land of Hope" had made the exhibit. It had been accepted for display with the best by the selecting committee. She crossed the room quickly to examine the card which hung from the modeled group. The data was accurate. There would be another week of suspense before the final award of the scholarship prize. She must help Peter to endure it, somehow. Of course, she hadn't much hope now for Peter's chance of the reward. She was only happy for him that his piece had been accepted. That should encourage him.

Besides, she now had an alternative to her first plans involving his removal to Paris. How fortunate that she had thought of suggesting that Peter could do some work for her to meet his loan from her. Had she made the suggestion now, he might have suspected that her pity prompted the plan. As it was, she already had arranged for his services if he did not go to Paris.

The idea presented two advan-

tages: instead of relieving him of his indebtedness to her, it would practically double his obligation to her in the light of gratitude. Not only would Peter feel obliged to her for the timely loan of money, but for the opportunity to repay it with his own work. She also would see that enough admiring friends placed orders to add considerably to that obligation. So, she still held the advantage—even without Paris. That would be but a simple step when she had won Peter completely.

Pairs, Rome, Athens—everything would be theirs to command, then. Her thoughts merged into the present tense, so confident was she of the future.

So engrossed was she in her plans that she almost collided with Peter in the corridor as she was leaving the exhibit room.

"Peter!" she exclaimed. "It's in!" not even granting him the thrill of discovering it for himself.

"Is it?" the gleam which lighted his eyes betrayed his calm. "I'm surprised."

"Oh, I'm not. It is a marvelous thing, but—"

"I know. You might as well say it has no chance with the others."

"Why, no," she denied. "Would you believe it, I have been in there for 10 minutes looking at that piece that I have seen dozens of times before, and I didn't even notice the other entries?"

He grimmed boyishly. "You are prepossessed, madam. You would make a fine judge, now, wouldn't you? Come back with me, and we'll see what else is there."

If she would refuse! She cared nothing about comparing the talents of his contemporaries, but just to walk beside Peter anywhere, to share anything with him, was sheer delight and an adventure.

She led him to his own work and he read with a strange rush of exultation the prosaic words of information on the classification card. Ostensibly, it was not important; but to Peter it represented a goal toward which he had been striving for four long, arduous years. He had not intended that it would be just like this, but at least, his work had met with the approval of the judges well enough to be in the display. It was a small personal triumph which portended much more than appeared on the surface. He had not worked in vain.

For a moment he forgot that he was not alone, so far did he withdraw into his own secret thoughts, Avis, the room, and its other occupants, the scores of plaster figures all about him, receded into space; and he was alone with his little moment of personal triumph.

Camilla was the first to intrude into that sanctuary of his thoughts, and it was almost as if he would speak with her that he turned toward Avis. Thus abruptly returned to the time, place and reality, his face clouded for an instant, like the sun is dimmed by the sudden passing of a small white cloud.

His comment was changed to, "Well, it's there!" with a long sigh of near-satisfaction. "Now let's see what argues with it." His critical eyes roved over the room. "Shall we try to pick the winner?"

They roamed about the room, commenting, admiring, criticizing. Avis favored only the symbolic figures such as Peter had prepared to enter. But Peter admired an excellent bust of the city's leading citizen, Andrew Hawcock.

"It's absolutely marvelous," he declared. "I've not only seen pictures of him, but I've seen Hawcock himself, talked with him. It is the true likeness of a human being that I've ever seen in plaster." He turned around. "That sea gull with spread wings is a beauty, too; every line is rhythmic and motion, but I doubt if it has a chance against this bust. I don't think there is a nude figure here that can compare with either of them."

"Then what about 'Land of Hope'?" she reminded him.

"Oh—that! It's completely out of the running. I am going back to work in earnest. At least, that much has inspired me. By the way are you in any hurry for your stuff?"

"Not if you have something more important to do. I can wait."

"Not at all. I just want to know where to begin. I'm at your service, if you say so."

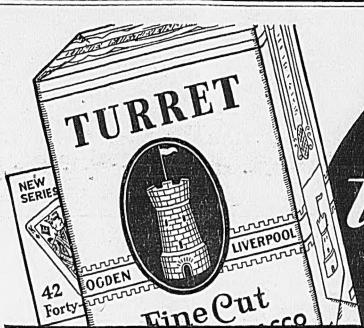

"I do say so!" she declared. "How about coming to tea at the house tomorrow and consulting with mother about the garden piece first. You can get them modeled and while doing the stone work you can fill in on my things at the studio."

"Fine!" he agreed. "You're a great planner, aren't you?"

"Plans are only great if they work out to the proper advantage."

"And what is that advantage?"

"Your success. It all depends on

you," she replied, with more significance than knew.

"That suits me." They were standing outside now, beside her smart coupe, parked at the earth. "I'll drop you at the studio," she suggested.

"Thanks a lot. But I'd rather walk, to help work off some of this newly acquired enthusiasm. Too much at one time is bad for the mental balance. Did you ever feel giddy with inspiration? Well, that is my present condition," he grinned. "Besides, I want to drop in somewhere right away and 'phone Camilla the good news. She will be anxious to hear. I promised to let her know as soon as possible."

Avis set her teeth hard over his shoulder to Camilla. It had not been since that first moment on the night of the tragedy. Nor had she dared mention to him the incident, even to learn what his reaction had been, or what they had said to each other. There are some forbidden places into which even the most audacious and unscrupulous may not enter. She would just have to be patient and await the outcome. Her campaign was now prolonged and confronted with added difficulties. But she was a good warrior who never admitted defeat.

"Well, so long," she waved gayly,

and darted away with a roar of the powerful motor.

Camilla was jubilant over Peter's announcement. "I knew it would get in," she told him. "Congratulations, darling. You have a little special dinner all prepared to celebrate tonight. Be there at six, will you?"

"Okay, sweetheart. But you took a pretty long chance getting that celebration ready before the victory, didn't you?"

"I disagree. It was a sure thing. But even so, a celebration was in order. It is quite an event to have you for a dinner guest, even."

He laughed. "You won't think it's an event when you have to face me across the dinner table every day for the rest of your life!" he warned.

"It won't be. It will be—paradise," she declared.

(To Be Continued)

What Canadians Eat

Estimated Consumption Of Meats, Butter, Poultry, Cheese And Eggs

There is nothing wrong with Canadian appetites, according to a bulletin issued by the Dominion Bureau of Statistics giving the estimated consumption of meats, poultry, butter, cheese and eggs in Canada. Figured on a per capita basis every person in Canada during 1933 ate 139.99 pounds of meat, 10.68 pounds of poultry, 30.4 pounds of butter, 3.20 pounds of cheese, and 21.42 dozen eggs.

Pork, although generally more expensive, was the most popular meat and the consumption per capita was 74.58 pounds. The per capita consumption of beef was 56.09 pounds and of mutton and lamb 6.32 pounds.

The estimated consumption of meats in Canada during the year was 146,329,940 pounds; of poultry, 114,449,000 pounds; butter, 320,821,718 pounds; cheese, 35,255,660 pounds, and 229,146,612 dozen eggs were consumed.

The Canadian Shield

The central part of Canada is underlain by a great expanse of very ancient, hard crystalline rock known to geologists as the Canadian shield. This has an area of about 2,000,000 square miles, or more than half that of the whole Dominion.

The Canadian shield

Sink Great Shaft

Would Bore Deep Hole In Earth To Tap Unlimited Power

The boring of a great hole into the earth, with all mankind lending a hand to the job, was suggested before the American Association for the Advancement of Science in a paper prepared by the late Dr. C. E. Grunsky, president of the California Academy of Sciences.

The paper was read by Dr. F. N. McFarland, vice-president of the California academy, who succeeded Grunsky upon the latter's death June 9.

Dr. Grunsky's thesis said if mankind would sink the great shaft as far as human ingenuity would permit, the results would fully repay the effort.

The centre of the earth is a great reservoir of power, if it could be tapped, gigantic pressures of 900,000 pounds a square inch would be the reward.

Dr. Grunsky did not conceive that man could burrow down very closely to the central core of the globe but suggested a great co-operative effort would result in penetrating the outer crusts to a vastly greater depth than ever before—depths he thinks could be reached which would tell science much valuable things.

Joining the present campaign against use of foreign-made goods, many organizations are passing resolution pledging all members to use only Chinese made products. The entire staff of the ministry of railways at Nanking, for instance, has sworn a solemn oath to wear nothing not made of native materials.

Chinese women are objects of particular attack in this campaign against foreign goods. The women of the treaty ports, and those who adopt a semi-foreign mode of life and dress, are being particularly denounced as unpatriotic.

Another Useless Invention

Cellophane Lining For Bathtub To Eliminate Rings

"No more rings around the family bathtub."

This is the promise held out by Robert I. Innes, Long Wharf ship model maker, who, in spite of the handicap of having a crippled arm, has patented an invention which should do much in the way of preventing domestic discord arising from those rings which add nothing to a bathtub's beauty.

The invention consists of a specially treated waterproof cellophane lining which can be instantly loosened from the inside of the bathtub by means of a rickcord when the bather is through.

Strange Dictionary

Smithsonian Institution Compiling Record Of Indian Sign Language

The strangest dictionary ever compiled, listing not words but signs, is being completed at Washington to rescue from oblivion the Indian sign language which was once North America's "universal tongue" from coast to coast. Hundreds of signs and their word meanings are being listed on cards by Smithsonian institution scientists with the aid of Richard Sanderville, 70-year-old Blackfoot Indian, one of the last of his race who knows the sign language.

Even small towns and rural districts in South Africa are feeling the prosperity wave.

Ask Mother— She Knows

Mother took this medicine before and after the babies came. It gave her more strength and energy when she was run down... kept her on the job all through the Change. No wonder she recommends it.

China's Adverse Trade

Great Outcry Is Made Against Use Of Imported Goods

In view of the fact China's adverse balance of trade this year promises to run to at least \$700,000,000, there is a great outcry in the country against use of imported articles of all kinds.

It is intended foreign goods and foreign cotton must be imported as necessities, but other foreign-made things, from automobiles to chewing gum, are now being denounced as "useless luxuries" by the Chinese language press. Incidentally, China imported \$2,000,000 worth of chewing gum last year, and the patriotic newspapers say most of it was consumed by young Chinese women who are dance-mad."

The paper was read by Dr. F. N. McFarland, vice-president of the California academy, who succeeded Grunsky upon the latter's death June 9.

Dr. Grunsky's thesis said if mankind would sink the great shaft as far as human ingenuity would permit, the results would fully repay the effort.

The centre of the earth is a great reservoir of power, if it could be tapped, gigantic pressures of 900,000 pounds a square inch would be the reward.

Joining the present campaign against use of foreign-made goods, many organizations are passing resolution pledging all members to use only Chinese made products. Chinese women are objects of particular attack in this campaign against foreign goods. The women of the treaty ports, and those who adopt a semi-foreign mode of life and dress, are being particularly denounced as unpatriotic.

Little Helps For This Week

"I would have you without carefulness." I. Corinthians 7:32.

O Lord, how happy should we be If we could cast our care on Thee, If we from self could rest; And feel at heart that One above, In perfect wisdom, perfect love, Is working for the best.

Cast all they care on God. See that all thy cares be such as thou canst cast on God, and then hold none back. Never brood over thyself, never stop short in thyself, but cast everything, even this very care which distresseth thee upon God. Be not anxious about little things if thou wouldst learn to trust Him with thine all. Act upon faith in little things. Commit thy daily cares and anxieties to Him, and He will strengthen thee for greater trials. Rather give thyself into God's hands, and so trust Him to take care of thee in all lesser things as being His, for His own sake, whose thou art.—E. B. Pusey.

Seems To Be Unwise

Manchester Guardian Comments On World Destruction Of Food

In any case, to an economist from other world, the whole wave of restriction—that is the deliberate destruction of food and raw materials—whether under the direction of Mr. Bruce or of Mr. Elliot or of Mr. Roosevelt, would appear fantastic. In nearly every country during the past few years, in the name of gold standards or balanced budgets, the standard of living of the mass of the people has been steadily forced down. Even in the pre-quota era in Great Britain signs of malnutrition among children were not lacking. Do we then encourage the farms of the New World to send us cheap bread, butter, and meat? No; we invite them to destroy it. The word has gone forth that cheap food is a curse. Manchester Guardian.

Girl Lawyers From India

Two girls from India have taken up law in London. Miss Bativalia, a young Parsee, is practicing as a barrister, and has just handled a divorce case before Sir Boyd Merriman. She comes from a lawyer family in Bombay, speaks English fluently and appears in her native costume, a purple sari.

Rejected Eggs at Red Deer Hatch in Blazing Sunshine

RED DEER, June 19, (Special)—A man in Red Deer has proof of the truth of this story in his back yard.

It seems that a local hatchery plant had kept a batch of five hundred eggs one day passed their hatching time and nothing happened. They naturally thought the eggs were bad. They took the whole five hundred in an assortment of boxes and took them to the nuisance ground.

The next day was a hot, sweltering day when thermometers were in danger of having their tops blown off, and a teamster who took a load of garbage to the nuisance ground was surprised to see several dozen baby chicks trotting around busily among the old car bodies and what have you. The teamster investigated and was in time to see a chick break its way through one of the five hundred eggs lying out in the sun.

He rounded up all the chicks and took them home, and now he has a well stocked chicken run numbering over fifty occupants.

It is understood that the hatchery that the hatchery people have stopped throwing eggs away.

--Calgary Herald

Heard Around Town

Rev. Donald McGregor who is in charge of the Cereal-Chinook churches preached his first sermon in the United Church here last Sunday.

Lloyd Leonard who has been visiting for a few weeks at the home of Mrs. Guss, while returning to his home, met a car that was skidding in the mud, and in order to escape having a collision drove into the ditch, when his car turned over. Lloyd escaped without having been injured, but his car was badly damaged. However, he managed to drive his car the remainder of the way.

On Friday, June 29, the Chinook W. I. held a farewell tea for Mrs. T. W. Nordin, at Mrs. Chapman's home. During the afternoon Mrs. McKenzie contributed music which was very enjoyable. After a social time with Mrs. Nordin to her new home at Erskine, Alta.
